November 2019 (version 1.41)

Update 1.41.1: The update addresses these [issues](#).

Downloads: Windows: [User System](#) | [Mac](#) | Linux: [snap](#) [deb](#) [rpm](#) [tarball](#)

Welcome to the November 2019 release of Visual Studio Code. There are a number of updates in this version that we hope you will like, some of the key highlights include:

- [Compact folders in Explorer](#) - Single child folders collapsed by default.
- [Edit left side of diff views](#) - You can now edit both files in a difference view.
- [Update search results while typing](#) - Global search results update while you type.
- [Problems panel improvements](#) - Filter by problem type and limit output to the active file.
- [Minimap highlights errors and content changes](#) - Quickly locate problems and changes in your file.
- [Terminal minimum contrast ratio](#) - Set preferred contrast ratio for increased visibility.
- [HTML mirror cursor in tags](#) - Automatic multi-cursor in matching HTML tags.
- [Optional chaining in JS/TS](#) - Use the `?.` operator to simplify working with nested structures.
- [Extract interface refactoring](#) - Quickly extract an inline type to a TypeScript interface.
